

PLASTIC PROFILES, PIPES AND HOSES

Customized solutions for every application area

We process all plastics in our energy-efficient production, from polyolefins to technical polymers with and without glass fibres or flame retardants through to high-performance polymers. Our production of customized solutions is based on many years of innovation and expertise. Your requirements for customized products are implemented using our polymer and extrusion expertise coupled with state-of-the-art manufacturing technology. Fine-tuned processes and logistics services ensure quality, reliability and commitment.

PLACE YOUR TRUST IN THE SPECIALIST IN EXTRUSION

PROFILES

- Development and manufacture of customised profiles
- All forms of single- and multiple-component extrusions such as combinations of hard and soft materials
- In-line processing such as punching, drilling and printing

WPC PROCESSING

- Long-standing experience in the extrusion of wood-plastic composites (WPCs) – also in co-extrusion
- Targeted use of renewable raw materials to improve profile properties

PIPES AND HOSES

- Development and manufacture of customised pipes and hoses
- Variety of dimensions \varnothing 3–110 mm
- Rigid, glass-fibre reinforced, soft, flexible and flame-retardant designs

SHEATHINGS

- For corrugated metal hoses and metal tapes
- Various thermoplastics such as PE, PEx, FEP, PVDF, TPU, etc.
- Application-specific choice of material

PLASTICS THAT CAN BE PROCESSED AT HAKAGERODUR AG:

- PP, PP-GF, PE, PS, ABS or ASA for technical profiles and pipes
- PMMA, PC
- PA6, PA6-GF, PA66, PBT, PPO, PVDF for special requirements
- TPE and soft PVC for sealing profiles such as gaskets and sealing lips
- Targeted use of recycled materials such as rPET, PE, PS-HI, and many others

Our portfolio is expanded on an ongoing basis.
